Store Hours Monday to Friday 8:00 AM – 5:00 PM

Saturday 8:00 AM – 2:00 PM

Dear Valued Customer:

THANK YOU for your support and use of our Farm Supply Products. We carry the items in this catalog and have in stock or access to, many other items not listed. If you are looking for a specific item, please call for availability. Quantity discounts are available as well as design services. Due to tariffs and freight, products will likely have price increases throughout the year. Everything we offer in this catalog has been field tested and proven on our own farm as well as others. If you have questions about a product please call. **Pricing subject to change without notice.** We do our very best to stock every item, in the case of a shortage, substitute equivalent products may be used.

Terms and Conditions

Payment Terms: We accept Cash, Checks, Visa or Mastercard. Payment is to be made before shipment or at the time of pickup of product. Credit Card purchases over \$1000.00 are subject to a 2% service fee. Any Unpaid balances are subject to a 3% monthly finance charge. To keep prices low, we will no longer offer Charge Accounts.

Shipping: We ship daily using UPS or USPS and for large orders we can arrange a Common Carrier. We can also deliver at a low cost. All shipping costs are paid by the customer. Shipping errors, shortages and or damage must be reported within 10 days of receipt. Shipping addresses must be supplied correctly from the customer. Reassignment fees will be charged.

Pickup and Special Orders: Please allow 3 days for the order to be pulled prior to pick up. Orders not picked up in 30 days will be canceled and returned to stock. Special ordered items plus shipping costs must be paid for prior to processing an order. **No returns offered on special order product or direct shipped items.**

Credit Invoices: In the case of overpayments, cancellations, shortages, returns, defective products, credit invoices will be issued. Credit invoices not used will be mailed annually but after 15 months will be voided.

Returns: No merchandise may be returned without authorization from our office. Returns must be communicated and processed within 30 days of sale and are subject to a 25% restocking fee.

Warranties are manufacturers' warranties only and none are expressed or implied by Brookdale Farm Supplies.

Hours: Office hours are Monday to Friday from 8am to 5 pm and Saturday 8 am to 2 pm, closed at noon for lunch. Pick up may be made during these hours unless prior arrangements have been made. Directions to Brookdale are on the back of catalog.

Ag

The Most Trusted Name in Water-Reels®

Checchi & Magli

Brookdale Fruit Farm, Inc. is located in south-central New Hampshire and offers a wide selection of irrigation and growing supplies. Our goal is to offer quality irrigation and growing supplies at a fair price throughout the North East region. We are a 7th generation family owned and operated fruit and vegetable farm. We use most of the products in our catalog annually and try all products prior to offering them for sale. We are happy to answer any questions you may have and show you how our products work. Our customers enjoy coming to pick up their supplies once a year to get a tour around our farm to see products in use prior to purchasing them. We can help you design an irrigation system to insure low-cost and efficient water application or for NRCS contract needs.

Toro Aqua Traxx Azul Premium Drip Tape

Aqua-Traxx® drip tape is designed and molded with a high level of precision, resulting in manufacturing consistency over 97 percent — the best in the industry. With Aqua-Traxx, you get greater reliability and more uniform output compared to lesser tapes. Aqua-Traxx Azul offers a new emitter design that protects the labyrinth from debris and maximizes clog resistance and performance. This reduces the filtration requirement to **120 mesh**.

Toro FlowControl Drip

Scan for more info

Toro FlowControl drip tape is the latest advancement in precision drip irrigation. FlowControl is the only flow-regulating drip tape available — giving you more control and uniformity wherever you farm. The innovative flow-regulating design provides you with the flexibility to increase or decrease flow while maintaining a uniform output across changing elevations. Now you have more control over how much water your crops get, especially in long runs or hilly terrain, where water pressure can vary throughout the run. FlowControl is ideal for heavy feeding high value crops.

BENEFITS OF FLOWCONTROL

vs. Standard Drip Tape

- ▶ High uniformity on longer runs and hilly terrain
- ▶ Improved system performance as a result of better irrigation uniformity
- ▶ Increased planting and harvesting efficiency by farming longer lengths of run
- ▶ Eliminate extra manifolds and labor-intensive jumpers (micro-tubing used to regulate pressure)

vs. Pressure-Compensating Tape

- ▶ Retain flexibility to increase or decrease application rate for greater control over watering and scheduling decisions
- ▶ Available in a wider range of thicknesses to meet the needs of all farming applications, including more affordable 5/8-inch 6mil and 7/8-inch 8mil
- ▶ One price for any emitter spacing from 6 – 24 inches, giving you the wetting pattern you want without paying a premium
- ▶ Designed with patented PBX technology for increased durability, clog resistance and uniform output

ADVANTAGE **1** MORE UNIFORM OUTPUT FOR ANY TERRAIN

STANDARD TAPE

Standard tapes stress plants and reduce yield and efficiency by over- or under-watering as pressure changes throughout the run.

RESULT: Wasted water and fertilizer, stressed plants and reduced yields.

FLOWCONTROL™

Toro FlowControl gives you uniform output regardless of elevation changes. So now you can adjust the amount of water you give your plants on hilly terrain, and they'll all receive the same amount through our uniform delivery system.

RESULT: More uniform plants and higher yields even in hilly terrain that might otherwise be impractical to farm.

Drip Irrigation Tape

Streamline X from Netafim is a thinwall, non-pressure compensating, drip line with an injected molded dripper. This new extra tough dripline has a ribbed surface to act as a barrier between the ground and install tube making installation and retrieval smoother with less punctures. The injection molded drippers are welded into a wall of seamless tubing, the dripper has flap outlet protection which reduces soil ingestion and root intrusion throughout the season. 120 mesh filtration

DripNet PC from Netafim is a thinwall, pressure compensating drip line. DripNet PC drippers deliver precise and equal water applications anywhere with high uniformity. Call for options and pricing.

Chapin Deluxe is a high quality, non-pressure compensating drip tape. It offers a continuous filtration channel to keep the debris away from the flow path and allows the tape to purge by flushing, ensuring high performance and extending the life of the tape. The slit design outlet will help prevent root intrusion and soil ingestion.

Thickness	Spacing	Roll Length	Flow Rate gpm/100	Part Number	Max Run length*	1-15 Rolls	16+ Rolls

T-Tape is a non-pressure compensating drip tape. T-tape's vortex labyrinth design creates a high degree of turbulence to help prevent clogging. High numbers of inlet filters provide outstanding clogging resistance. Upon water shut off the slit outlet collapses to help prevent soil ingestion and reduce root intrusion.

Cast Embossed Plastic

1.5 Mil Black Embossed

Great for multi-year crops / Strawberries

Size	Part Number	Weight	Price
4' x 2000'	BEM48215	58 lbs.	\$98.00
5' x 2000'	BEM60215	72 lbs.	\$122.00

Cast Embossed plastic, the stretchy film. It lays easily over raised beds and uniformly molds to the shape of the bed. The embossing technology allows the plastic to be wind resistant and reduces lifting. It is UV treated so it lasts the season and is easy to pick up in the fall. The toughest plastic that resists tearing and is best for raised beds. Plastic comes 16 rolls to a pallet. Prices below are per roll. Full pallet discounts, \$3.00 per roll less

1 Mil Black Embossed

Most common Grower preferred plastic

Biodegradable & Compostable Mulch Film

The Biodegradable and Compostable Mulch Film from Poly Expert is made of Mater-Bi, a bio plastic that is completely biodegradable and compostable according to BPI standards. This biodegradable mulch has the same mechanical and physical characteristics as plastic mulch without the negative impact on the environment. Poly Expert manufactured Bio360 and has just released their product under their own brand name—Bio Guard. Same formulation, same product, just a different name. Bio Guard breaks down with organic matter in the soil. The 0.6 mil thick material is ideal for peppers, tomatoes, and cucurbit crops. The 0.8 mil works best with melons and winter squash. Soil condition drives the biodegradable characteristics of this plastic. Varying soil conditions will impact plastic differently. It is best to start with the 0.6 mil and determine after a year's use if a thicker or thinner material is desired. **Call for pricing on multiple pallets.**

Made in North America

COMPOSTABLE
IN INDUSTRIAL FACILITIES

Check locally, as these do not exist in many communities. **Not suitable for backyard composting.** CERT # 10528850

Solar Shrink

Item	Part Number	Price
Solar Shrink 48" x 4000'	SSH4840	\$152.00
Solar Shrink Select 48" x 4000'	SSE4840	\$185.00
Solar Shrink 60" x 4000'	SSH6040	\$190.00
Solar Shrink Select 60" x 4000'	SSE6040	\$231.00

Solar Shrink plastic is a stronger plastic that shrinks tightly to the bed once it is laid and in the sun. This film is manufactured on custom machinery that physically modifies the molecular structure of the sheet, vastly increases its breaking strength and puncture resistance. It is thinner than the typical 1 mil plastic, but is stronger than the typical 1.25 mil plastic. It is easier to pick up due to the added strength. Since it shrinks tightly to the bed the plants do not experience injury from the plastic rubbing. Ideal for high traffic plastics and multiple picking events.

Clear Perforated Multi-Row

Great for spring use to increase soil temperature. Easily cover multiple rows at a time. Ground and air temperature are increased 3.5-5.5 degrees during the day. Great for tubers, brassicas, sweet corn, strawberries and more.

Size	Mil	Part Number	Price
33 x 328	1.6	RC-P33	\$195.00
39 x 328	1.6	RC-P39	\$230.00

Greenhouse Plastic

14' x 100' Tufflite IV	TIV14100	\$126.00
36' x 100' Tufflite IV	TIV36100	\$325.00
36' x 100' Tufflite IR	TIR36100	\$360.00
48' x 100' Tufflite IV	TIV48100	\$435.00
48' x 100' Tufflite IR	TIR48100	\$480.00
56' x 100' Tufflite IV	TIV56100	\$505.00
56' x 100' Tufflite IR	TIR56100	\$560.00

Tufflite plastic is a 6 mil 4-year plastic. The IV is for single layer houses and the top layer of a double skin house. The Infrared (IR) plastic is for the bottom layer of a double skin house. It is a single side drip-less, anti-condensate. Other sizes available for special order. 2 week lead time.

Greenhouse Poly Patch Tape

Item	Part Number	Price

4" x 48" Poly Patch Tape	PPT04	\$17.00
6" x 48' Poly Patch Tape	PPT06	\$24.50

Floating Row Cover

A non-woven fabric that is tear resistant and protects against cold temperatures, wind, and insects. It raises the soil temperature and air temperature by several degrees depending on weight. A light weight product for young plants yet sturdy enough to last the seasons. UV treated for stabilization. Best used in field with hoop structures and held down with sand bags or buried with native soil. 36' and larger sizes have reinforced edges for superior hold down strength. Widths up to 7' can ship UPS, all other sizes ship freight.

15' x 300' white/black	WG-123wb	\$370.00

Silage Tarps

White on black 5 mil reusable plastic. Used to create stale seed beds, plant through, or greenhouse flooring. Stocked in portable sizes and weights. Stocked sizes can ship UPS- larger sizes ship LTL.

Size	Part Number	Price
24' x 50'	ST-245	\$ 98.00
24' x 100'	ST-241	\$186.00
32' x 50'	ST-3325	\$125.00
32' x 100	ST-321	\$237.00

Slitted Row Cover

6' x 1000' x 0.8 mil clear plastic

Item	Part Number	Price
Slitted	RC-S610	\$122.00
Punched	RC-P610	\$122.00

Growing Supplies

Tomato Stakes

Honduran Pine Stakes, resistant to warping and shattering, High quality will last for years. Sold in bundles of 25. Price is per stake

1225 per pallet -1¢ each pallet order

Item	Part Number	Price
48" Pointed	TS-48P	\$1.00
54" Pointed	TS-54P	\$1.14
60" Pointed	TS-60P	\$1.22
72" Pointed	TS-72P	\$2.30

Fiberglass Stakes

Coarse on the outside to hold tomato twine. Available in 2 thicknesses and 2 lengths. Sold in bundles of 25.

Pricing is per stake.

Item	Part Number	Price
5/16" x 6'	TSF-56	\$1.65
1/2" x 6'	TSF-16	\$3.50
3/8" x 10'	TSF-31	\$3.90

Tomato Twine- TS-TW

2100 ft, 3 lb Roll or 18 box case

Item	Price
1-9 boxes	\$8.00
10 + boxes	\$7.50

Vine Clips

Used when growing tall plants or vine crops to clip the plant to a string or trellis support wire. Ideal for tomatoes, cucumbers, and pepper growers.

Item	Part Number	Price
Box/1,000	BVCB	\$17.00
Case/10,000	BVCC	\$110.00

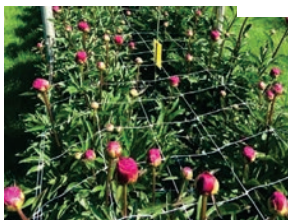

Bailing Twine, sold in a 2 pack

Length	Color	Knot Strength	Price
7200'	Blue	190	\$64.00
9600'	Blue	170	\$76.00

White Trellis Netting

Designed to support flowers and climbing vegetables. Made from white polypropylene, UV stabilized and resistant to bacteria and mold. 6" square mesh.

Item	Part Number	Price
48" x 328'	TN48	\$51.00
59" x 328'	TN59	\$58.00
78" x 328'	TN78	\$68.00

Greenhouse Tomato Trellising Hooks

For trellising tomatoes and cucumbers in a greenhouse. Hang on a high wire or use S-hooks.

Twine Hooks: Wire hook releases approx. 7" of twine each time it is turned over.

Bare Hooks, use HD Twine, **GHTH \$0.16 per \$118/case of 984**

Twine Hooks w/40' twine GHTHT \$0.32 per \$118/case of 420

HD Winmore Tying Twine, heavy -duty blue/white twine, 6500' per roll **TS-TD \$25.00**

Roller Hook: easily lower crops in a smooth and efficient way. Heavy-gauge wire frame supports a spool of twine with 100' feet of UV-resistant white twine. Easily clips over wire. Concurrently releases twine while sliding down the wire to lower and lean your trellised crop.

Roller Hook Frame GHRHF \$0.25 per \$121/case of 550

Roller Hook Spool with 80' twine GHRHS \$0.45 per \$220/case of 550

TunnelFlex

A versatile, retractable low tunnel growing system. Ideal for day-neutral strawberries, tomatoes, and peppers. Allows for season extension by protecting plants from the elements, reducing disease pressure, and can also include insect exclusion with ProtekNet netting. A cheaper alternative to high tunnels that can be used in varying terrain and field conditions. Call for large area pricing.

Protecting Your Investment
Has Never Been So Simple.

Prices are subject to
change due to tariffs

3 Hoop Sizes

28" wide x 39.5" tall --ideal for strawberries and melons

32" wide x 63" tall --ideal for tomatoes and bell peppers

46" wide x 39.5" tall --ideal for 4 row wide strawberries

How to build a Tunnelflex System

Follow the check list to make sure all the necessary parts are ordered.

- ✓ Plastic—type is determined by hoop size
- ✓ Hoops with eyelets, placed every 5 feet
- ✓ End hoops, coated with plastic 2 per row
- ✓ End anchor stakes 2 per row
- ✓ Steel stakes to anchor hoops 1 per hoop
- ✓ Bungee Elastics 1 per hoop

Orchard Fittings

For use with Ram Uniram (17mm), Toro Blueline (18mm) and others. Please note the size of the tubing. We also have fittings for 20 mm tubing, both Uniram and Blueline as well as others. For farms with multiple sizes try the Pro-Loc fittings, series 700 can be used for 17-18mm tubing while series 800 can be used for 20-21 mm

For Vineyards and Orchards looking to suspend their orchard tubing on a wire, H-Curls, shown above, or the clips rings, shown above are the best options

Filter Assemblies

Brookdale manufactured filter assemblies are designed to backflush each filter for easy cleaning. Color coded valves make the back-flushing process visual and simple. Integrated input and output pressure gauges show the differential pressure across filter system. Each unit comes assembled with brass valves for longevity, a garden hose valve and fitting for accessing clean water, a check valve, and inlet and outlet camlock fittings. These systems are designed with a pressure relief valve in case the filters clogged. The assemblies meet NRCS standards of design for filtration.

Type	Irrigation Capacity		Price
	Good	Poor	
2" short disc filter	80 gpm	45 gpm	\$450.00
2" long disc filter	100 gpm	50 gpm	\$560.00
2" twin long disc filter	200 gpm	100 gpm	\$1,400.00
3" twin long disc filter	220 gpm	120 gpm	\$1,950.00
4" twin long disc filter	240 gpm	140 gpm	\$2,250.00
3" triple long disc filter	330 gpm	165 gpm	\$2,850.00
4" triple long disc filter	340 gpm	170 gpm	\$3,400.00

Automatic Backflush Filter

Brookdale manufactured auto back flushing filter assemblies are designed to automatically backflush each filter. This allows you to continuously irrigate without losing pressure due to clogged filters or having to return to the field to clean the filter. Using the Toro Tempus Ag platform, you can program the backflush cycles using your cell phone's Bluetooth connection. The filter backflushes on timed intervals. This assembly can also be part of a Tempus Ag system for your entire farm. Filters ship assembled with 1-hour backflush

Type	Irrigation Capacity	Price
2" twin long disc filter	3 acres	\$3,300.00
3" twin long disc filter	5 acres	\$4,175.00
4" twin long disc filter	6 acres	\$4,450.00
3" triple long disc filter	8 Acres	\$5,650.00
4" triple long disc filter	10 acres	\$6,550.00

Netafim AlphaDisc filter, automatically separates and cleans the filter discs during the auto backflushing cycle. The AlphaDisc smart controller is controlled completely through an app installed on your phone. It allows you to determine a pressure differential to trigger the backflush. During the backflush the filter discs are separated and sprayed with water to help dislodge the built-up sediment. The AlphaDisc filter even has a temperature sensor to open valves when it gets near freezing.

Type	Irrigation Capacity/water quality		Price
	Good	Poor	
3" Single	165 gpm	138 gpm	\$4500.00

4" Single XL	360 gpm	300 gpm	\$11,000.00

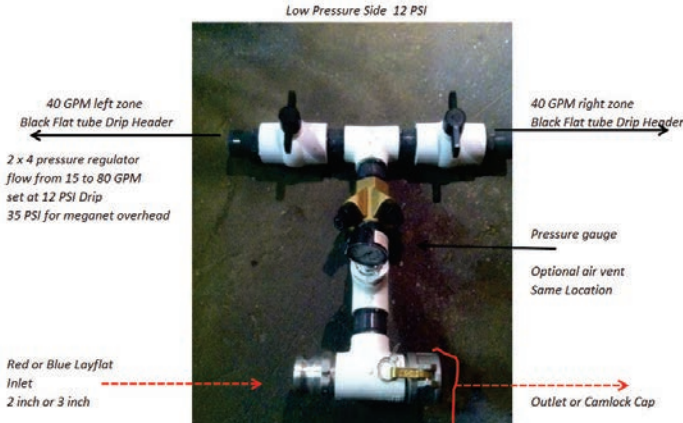

Single XL 3 3/4"

Pressure Regulators

Netafim pressure regulators allow the grower to switch the preset pressures by removing the pressure regulating tips and replacing them with different tips. This allows the grower flexibility between pressure regulation for drip tape, orchard tubing, greenhouse sprinklers and Meganets. Pay attention to the GPM range of each regulator when sizing a regulator for your application.

Injector assemblies are designed to plug in line after a filter assembly, or before an H station. The assembly includes injector isolation valves, for access to clean the injector during operation and a garden hose spigot for filling the fertilizer barrels. When filter and injector assembly are hooked together there are 3 check valves in line as required by the EPA to prevent backflow to a water source. The mazzei injector assemblies are designed to apply x amount of product per acre in one application, not a constant dosing rate. In order to choose the appropriate injector, match the flow rate range of drip operation with the injector size flow rate in the table.

H-Valves standardize pressure regulators allowing the grower flexibility to changing field locations or field rotations for setting up drip or overhead irrigation. Placed centrally in the field the H valve manifold allows zone control for irrigation splitting the field in half. Built entirely with threaded fittings these units are easily repaired or changed in the field. These units include a pressure gauge to ensure proper pressure at point of use in the field. Pre-assembled units below are stocked and ready for use.

Inlet Size	Outlet Size	Pressure Reg	Price
2 inch	2 inch	1 1/2"	\$275.00

Fertilizer Injectors

Mazzei Fertilizer Injectors

Mazzei injectors offer trouble free performance with no moving parts. They operate on a pressure differential between the inlet and outlet of the injector to create a vacuum and draw fertilizer in through the suction port. It is important to have the proper sized injector for the flow rate at which the system is operating. These are a non-proportioning injector, meaning the amount of fertilizer applied is based on an amount per acre diluted in solution, rather than a PPM constant feed. Pricing below includes injector and suction hose with check valve.

Model	Size	Part Number	Flow Rate	Suction	Price

MixRite Proportional Injector

An automatic injector that compensates for any change in water pressure and flow to provide a constant mix of fertilizer at a set rate. Used in greenhouse and field applications for precise metering of water soluble fertilizers. UV stabilized plastic with On/Off valve and built in check valve. Mix Rite injectors are unique where the injected fluid is mixed in the entire chamber of the injector, lubricating all moving parts. Each new injector comes with a rebuild kit and suction line. Adjustable ratio's from 1:25 to 1:250

Sand Media Filters are designed for drip irrigation systems operating up to 125 psi and 300 gpm+ Sand media banks are available from Toro Yamit Filters and Netafim Sandstorm Media filters. Please call for design and quote.

#16 Silica Sand ...FMS \$22.50

50 lb bags, 60 bags per pallet

Apollo Disc-Kleen Filters from Netafim are automatic back-flushing disc filter assemblies available in 4 inch to 6 inch systems. Requires a controller. Call for pricing and sizing for your application.

Water Soluble Fertilizer

Plant Marvel's Nutriculture fertilizer allows growers to 'spoon-feed' their crops through drip irrigation. The Nutriculture fertilizer offers a complete macro and micro nutrient package to the plants. The nutrients are already in the plant soluble form which allows the nutrients to be taken up quickly giving you results within a few days. The fertilizer is also suitable for foliar applications. These fertilizers are blended specifically for New England Vegetable, Tree Fruit and Greenhouse production. Sold in 25 lbs bags. Call for 50+ bag quantity or pallet pricing, below per bag pricing.

<p>Veggie Special...12-5-19 PM-120519....\$39.00 With 7.6% calcium and 1.3% Magnesium this formula is specifically designed to meet the needs of field grown vegetables. There is increased boron to promote better flower development and increased fruit set.</p>	<p>Berry Blend...28-8-15 PM-280815.....\$36.00 Specifically formulated for blueberries, cranberries, blackberries, raspberries, as well as other small fruits. The NPK ratio meets the nutritional demands while providing other elements needed for abundant fruit set.</p>
<p>K Mag...15-5-30 PM-150530....\$41.00 This high potash formula is ideal for producing larger fruit size, flower count and extending post-production shelf-life. The high nitrate content ensures utilization of all the nutrients.</p>	<p>Hi-Cal Special...15-0-15 PM-150015....\$34.00 With 10.5% calcium this formula contains high nitrate nitrogen, calcium magnesium and minor elements.</p>
<p>Cal Mag...14-4-14 PM-140414....\$39.00 With 5% calcium and 2% magnesium</p>	<p>Orchard Special...16-4-13 PM-060413....\$37.00 With 6.04% calcium and 1.56% magnesium. Boron and zinc in plant available forms</p>
<p>Mag-Iron ...18-6-18 PM-180618....\$40.00 High Magnesium and Iron. Iron is provided in to different forms, EDTA and DTPA. The formula is high in Nitrate Nitrogen, great choice for providing lush green foliage on annuals.</p>	<p>Cal Mag...17-5-17 PM-170517....\$40.00 Contains most of the major, secondary and minor elements almost any crop would need. 4 % Calcium, 1% Magnesium.</p>
<p>Super Start...12-45-10 PM-124510.....\$43.50 Helps overcome transplant shock. The nitrogen is low enough to prevent burning but still encourages new top growth. Organic Fertilizers

Neptune's Harvest Fertilizer

Neptune's Harvest Organic Fertilizers are OMRI listed for certified organic production. Neptune's Harvest can be applied foliar or fed through the drip irrigation lines as long as a 15-minute fresh water flushing cycle is conducted after injection. Also used in transplant water and favored fertilizer for Giant Pumpkin Growers.

Media Master Pot & Flat

This versatile machine features both a bale buster and pot/flat filler. Requires single phase 230VAC. Pre-wired with plug, full load 14 amps.

Pot/flat filler features: Fills pots/flats up to 14" wide and up to 12" tall. The leveler assembly height is easy and quick to adjust via a winch. Distribution chute is adjustable to evenly fill the pots & trays. Water-resistant control panel features variable speed controls for the conveyer and for the supply auger.

Bale buster features: A series of rotating arms that quickly and thoroughly mix and loosen soil in less than a minute. Capacity of 21 cu ft. loose (3= 3.8 cu compressed bales). Convenient fill height of 34". Overall dimensions 113" wide x 48" depth x 70" height. Order early, 3-week lead time.

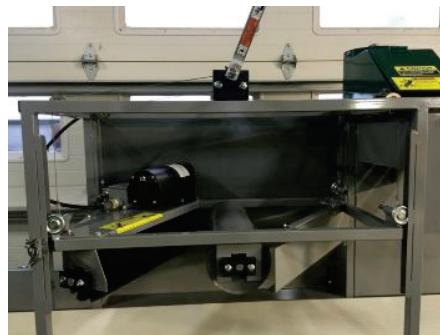

MMP.....\$10,750.00

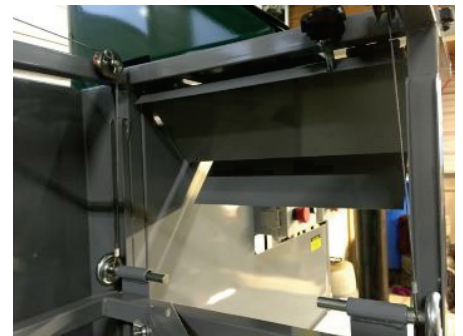

Rear View

Leveling roller and brush assembly

Adjustable distribution chute

Media Master Water Tunnel: can be used as a stand-alone unit or in line with flat filler. 4' long water tunnel.
MMWT Call for info

Media Master Bale Buster

Features a hopper with a capacity of 14 cu. Ft loose (2--3.8 cf compressed bales). Has a series of rotating arms that mix and loosen soil in less than a minute. Thorough mixing allows you to add additional products to your mix. Convenient fill height of 34". The supply Auger & fill chute allows you to easily fill pots and trays manually. Requires single phase 230VAC. Pre-wired and ready to plug in. Overall dimensions: 54" width x 48" depth x 69" height. Order early, 3 week lead time. **MABB \$6,780.00**

Details of mixing arms

Details of filling auger and chute

Pro-mix BX

Is ideal for growers looking for a general-purpose medium. Ideal for starting transplants. Grower's benefit from the nutrient retention of vermiculite and the perlite providing limited but proper drainage capacities. 75-85% Spahgnum peat moss, perlite, vermiculite, limestone, wetting agent.

3.8 cu ft compressed

Description	Item #	Less than Skid	30/Skid
BX Original	PMBX-38	\$31.75	\$31.50
BX with Mycorrhizae	PMM-38	\$33.60	\$33.25
BX with Mycorrhizae + Biofungicide	PMMB-38	\$34.50	\$33.75

2.8 Cu. Ft. Loose Bag

Description	Item #	Less than Skid	57/Skid
BX with Mycorrhizae	PMBX-28	\$17.60	\$17.50
BX with Mycorrhizae + Biofungicide	PMMB-28	\$18.30	\$18.15

Pro-mix MP Organik

Is ideal for certified organic growers looking for a general-purpose medium. This growing medium delivers well balanced air/water qualities and is designed to meet crop requirements for certified organic growers. 60-70% Spahgnum peat moss, cori- horticultural grade, perlite, limestone, wetting agent, mycorrhizae, biofungicide. 3.8 cu ft compressed.

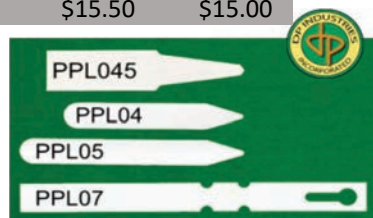

Description	Item #	Less than skid	30/Skid
MP with Mycorrhizae + Biofungicide	PMOG	\$38.25	\$37.90

Pro-mix Peat Moss

Pro-Moss "Hort" Sphagnum Peat Moss Certified OMRI

Description	Item #	Less than skid	30/Skid
Peat Moss 3.8 cu ft	PMPM	\$15.50	\$15.00

Soil

Mycorrhizae: *Glomus intraradices* is a biological growth enhancer that is naturally found in soils. It improves fertilizer and water uptake, increases the plants resistance to stress, both in the greenhouse and later in the field. Increases root mass, plant size and flower production.

Biofungicide: *Bacillus pumilus* is a naturally occurring strain of bacteria that combats many harmful organisms such as *Fusarium*, *Pythium*, and *Rhizoctonia*, these organisms cause diseases such as root rot, crown rot and damping-off. It improves germination and increases plant growth.

Pro-mix FPX, Germination Mix

This fine grind mix is ideal for germination and plug growing. Canadian Sphagnum peat moss, plug grade fine perlite, Limestone (pH adjuster), wetting agent.

****PGX has been discontinued, this is very similar****

Description	Item #	Less than skid	57/Skid
FPX with Biofungicide 2.8 cu ft bags	PMGX	\$19.50	\$19.00

Vermiculite & Perlite

Horticultural grade. Both vermiculite and perlite are used to prevent soil compaction, improve aeration and retain moisture. Vermiculite acts more like a sponge, holding more water than perlite. Perlite retains water on its surface, but it is porous and allows excess water to drain. All bags are 4 cubic ft

Description	Item #	1-29	30/skid
Vermiculite, Medium	VMC2	\$22.50	\$21.50
Vermiculite, Fine	VMF2	\$20.50	\$19.50
Perlite, Coarse	PLC1	\$18.50	\$17.50

White Plastic Labels

Description	Item #	Price
4 1/2" x 1" (1,000/roll perforated)	PPL045	\$20.50
4" x 5/8" (1,000/box- loose)	PPL04	\$26.75
5" x 5/8" (1,000/box-loose)	PPL05	\$30.50
7" x 5/8" loop tag (1,000/roll perforated)	PPL07	\$31.50

Soil

LM-18 Germination formulated to promote effective and uniform germination. Includes perlite for more air space.

Item	Size	Item #	# Skid	Less than skid	Skid
LM-18	3 cu ft loose	LM18L	48	\$14.60	\$14.25
LM-18	3.8 cu ft compressed	LM18C	30	\$28.00	\$27.50

AgriTape Heat Mats

AgriTape heats up when electrified with standard house current (110 volts AC) and generates heat up to 95°F that is extremely uniform across the mat. To install, roll mat out, connect ground screen to it and plug into controller. Controller comes with a soil temperature probe. Can set temperature on controller. Heat mat can increase the temperature up to 20°F hotter than the house temperature. Heat mat includes ground screen, order controller separately.

LM-18 Germination OMRI formulated to promote effective and uniform germination. Includes perlite for more air space.

Item	Size	Item #	# Skid	Less than skid	Skid
LM-180	3 cu ft loose	LM180	48	\$16.90	\$16.50

LM-111 All Purpose coarse Canadian sphagnum peat moss, peat chunks and coarse perlite. Ideal for growers looking for a versatile product for many crops.

Item	Size	Item #	# Skid	Less than skid	Skid
LM-111	3 cu ft loose	LM111L	48	\$14.25	\$13.95
LM-111	3.8 cu ft compressed	LM111C	30	\$27.00	\$26.50

LM-193 All Purpose has a specially selected grade of Canadian sphagnum peat moss, with coarse perlite and vermiculite. Comparable to the Pro Mix BX.

Item	Size	Item #	# Skid	Less than skid	Skid
LM-193	3 cu ft loose	LM191L	48	\$14.50	\$14.25
LM-193	3.8 cu ft compressed	LM191C	30	\$28.00	\$27.50

LM-111 All Purpose OMRI coarse Canadian sphagnum peat moss, peat chunks and coarse perlite. Ideal for growers looking for a versatile product for many crops.

Item	Size	Item #	# Skid	Less than skid	Skid
LM-111	3 cu ft loose	LM1110L	48	\$16.90	\$16.50
LM-111	3.8 cu ft compressed	LM1110C	30	\$33.50	\$32.90

TEMPUS-AG

Toro Tempus Ag Controller, a revolution in automation

The Toro Tempus Ag controller allows for full farm automation. Tempus Ag uses a LoRA radio signal to create a bubble which allows for wireless system automation. 1 base station produces a LoRA bubble of 5,200 feet in diameter. Multiple base stations can be added to cover large areas over one network for the entire application. The base stations can be operated on Wi-fi or with a 4G wireless signal. Tempus can run irrigation cycles as well as collect environmental data, allowing growers to adjust their irrigation schedules as needed. Tempus Ag can report on a variety of sensors; temperature, pressure, soil moisture, humidity and more. Tempus Ag works in an outdoor field setting, as well as indoor high tunnels or greenhouse environment. Tempus Ag can send alerts via the app or to an email if a user determined sensor threshold is exceeded.

For more information check out the Tempus Ag YouTube Video

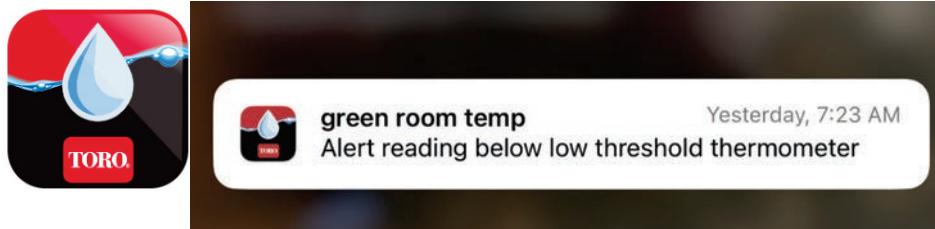

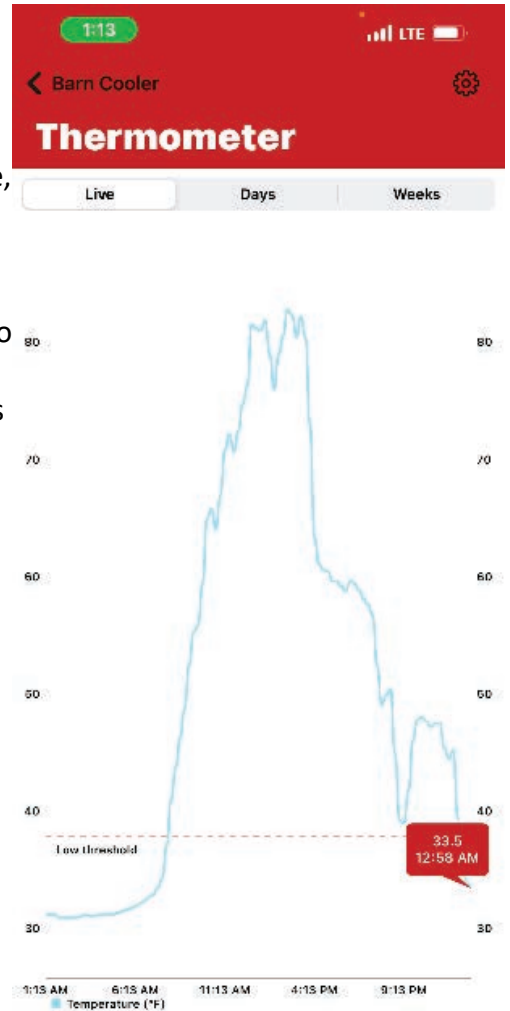

All controllers are connected via Bluetooth on your phone or tablet. This allows you to quickly adjust irrigation schedules or look at performance data in the field. All cluster programs are adjusted via the web-based platform.

For install information and helpful tips scan the QR Code

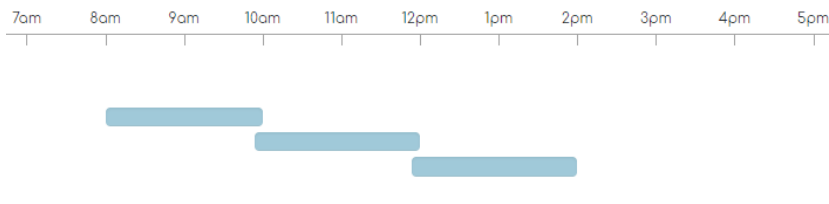

Automation

Tempus Ag can do many things when it comes to automation. Tempus is designed to turn on irrigation pumps, operate individual valves, monitor flow and pressure, and program fertilization cycles. Setting thresholds allows the user to know if specific conditions are met such as temperature, pressure, or soil moisture. Tempus is expanding to add its own weather station which is smartly integrated to the conditions of a program on the platform. Tempus can also use third party components to fully automate vents and roll up sides on a greenhouse for example. The platform can also be utilized for record keeping allowing the collected data to be downloaded in csv or an excel document. Tempus continues to expand its capabilities of sensors and actions to be utilized throughout the farm.

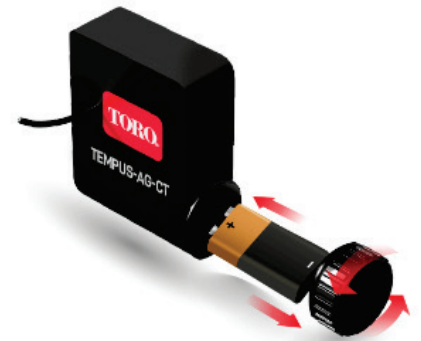

The Tempus Ag interface allows you to schedule irrigation cycles for each solenoid valve. Below is an example of an irrigation schedule.

Item	Part Number	Price
CT-1, 1 solenoid station	TEMPUS-AG-CT1	\$435.00
CT-2, 2 solenoid station	TEMPUS-AG-CT2	\$465.00
CT-6, 6 solenoid station	TEMPUS-AG-CT6	\$536.00
MS-1, 1 sensor station	TEMPUS-AG-MS1	\$260.00
MS-4, 3 sensors, 1 temperature sensor	TEMPUS-AG-MS4	\$285.00
Tempus Base Station, 4G	TEMPUS-AG-Base4G	\$2,010.00
Tempus Base Station, Wi-fi	TEMPUS-AG-BaseWi	\$2,010.00
Solar Panel Kit	TEMPUS-SOL20	\$465.00
Pump Relay	TEMPUS-Pump	\$215.00
Pressure Sensor	TEMPUS-AG-PR	\$690.00
Master Valve	TEMPUS-AG-MV	\$560.00
Level 1 Service Charge	TEMPUS-SIM-24C	\$725.00
Level 2 Service Charge	TEMPUS-SIM-96C	\$1,690.00

The yearly service charge is billed annually in March. There are two levels of the service plan. **Level 1** uploads data every hour, and allows you to change the programs 365 times per year. However, if an alert is registered, it will alert you immediately. **Level 2** uploads data every 15 minutes, and allows you to change programs an unlimited amount of times. Please Call for help in designing a Tempus System

Tempus control units are powered by a 9V battery. The system will alert you when there is 20% battery life left. Only the base stations require 110 volt or a solar panel to create the network. No grid power is required to operate the system. When using irrigation control valves they have to operate with a 12 volt DC latching solenoid.

Automation

Solenoid Valves

A-2500TF: 1" valves include key standard features such as flow control, manual internal and external bleed. Flow Range: 0.25-30 GPM Pressure Range: 10-150 PSI DCL or AC solenoid FPT **\$38.00 each**

A-100 Series valves heavy-duty globe/angle valves offer superior performance and durability. Simple on/off valve with manual internal bleed and manual external bleed (flush mode). Brass flow control stem, precise flow adjustment and manual shut off. FPT **2" A-100P2 \$180.00 3" A-100P3 \$245.00 DCL Solenoid \$38.00**

A-700 Series: 2" valves straight-through flow path to provide a low-pressure loss. Ideal for lower flow applications. Slow closing design prevents water hammer. FPT **A-700-2 \$170.00**

A-900 Series: 2-3" valves hydrodynamic valve seat and durable diaphragm eliminate vibration or distortion. The valve seat creates an easier path for the water through the valve, reducing pressure loss. Stocked as On/off valves. DC Latching Solenoid FPT **A-900-2 \$172.00 A-900-3 \$240.00** pressure sustaining valve call

A-900 Series: 4-6" valves same as the 2 and 3" except they are Victaulic or flanged connection. These valves can also be configured to be pressure regulating. Call for pricing

Bermad Pressure Reducing Control Valve with Solenoid Control is a hydraulically operated, diaphragm actuated control valve that reduces higher upstream pressure to lower constant downstream pressure regardless of fluctuating demand, and opens fully upon line pressure drop. Available in AC or DCL

2" IR-120 \$210.00 3" IR-130 \$289.00

Iron and Nylon control valves also available by Netafim. Call to pick the right valve for application

Soil Moisture Sensors

Watermark Sensors are designed to be in the field for the season, or for years in orchards, and read as often as needed. They are not affected by freezing and are easy to use. They have a 0-200 centibar range and are internally compensated. One hand held reader can read any number of sensors. Sensors can also be read via a channel data logger or a wireless mesh network.

Item	Item Number	Price
WaterMark Sensor 5' cable	WMSN	\$40.00
WaterMark Sensor 15' cable	WMSN-S	\$48.00
WaterMark Reader	WMRD	\$245.00
Watermark Voltage Adapter	WMVA	\$65.00

Additional Sensors for Tempus Applications

PT100 Temp sensor	PT1	\$20.00
Rain Sensor	RCS	\$50.00
Davis rain meter	DRM	\$210.00
Humidity sensor	HSS	\$180.00

Other soil moisture sensors available from Waterscout, Meter Group and Vegetronix

Flow Meters

Netafim IRT Flow Meters are ideal for tracking the water usage in a season. They have low head impact. Bearings are constantly flushed to eliminate deposits of solids. Sold as a Bolted Flange attachment.

Item	Part Number	Price

Automation

Toro Evolution AG Series Irrigation Controller

This controller is simple, economical and effective. It is built on the Evolution platform which allows for modular expansion, fertilizer injection, pulse irrigation, propagation and misting schedules with the ability to program valves to your specific needs: from 1 second to 24 hours.

- Operate up to 4 valves at one time
- Program valve run time from 1 second to 24 hours
- Manage 2 fertilizer pumps, can run on specific days or with every watering
- Modular expansion: 4, 8, 12 and 16 valves

Item	Part Number	Price
Four Station Evolution Controller	EVO04	\$280.00
Item	Part Number	Price
4-Station Expansion Module	EMOD-4	\$39.00
12-Station Expansion Module	EMOD-12	\$131.00
Smart Connect Plug-In Receiver	EVD-SC	\$78.00
Wireless Soil Sensor Probe	PSS-SEN	\$78.00
Wireless Weather Station	EVO-WS	\$70.00
SMRT Logic Internet Gateway	SMRT-T	\$104.00

Battery Operated Controllers

Waterproof, commercial grade, constructed of high impact plastic these controllers operate on 2 AA alkaline batteries for up to 3 years! Fully featured automation, semi-automation and manual operation all easily programmed with five buttons and an easy to read LCD display. Includes weekly calendar, can program odd days, even days or days 1-30.

Item	Part Number	Price
Controller with 3/4" valve	DIG710A07	\$100.00
Controller with 1" valve	DIG710A10	\$105.00
Controller with 1.5" valve	DIG710A15	\$170.00
Controller with 2" valve	DIG710A20	\$185.00

Bluetooth programmable controller 410 series

Item	Part Number	Price
Controller with 3/4" valve	DIG410A07BT	\$132.00
Controller with 1" valve	DIG410A10BT	\$136.00
Controller with 1.5" valve	DIG410A15BT	\$260.00
Controller with 2" valve	DIG410A20BT	\$300.00

Garden Hose Controller

Heavy duty plastic garden hose controller come standard FHT x MHT connections. Operates on one 9V battery, which can last up to one year. Allows for automatic and manual operations. Easy to program with 4 buttons and an easy read LCD display. Up to 4 start times per day. Max pressure 80 PSI. Flow rate up to 5 gpm at 30 PSI.

Item	Part Number	Price
Battery Garden Hose Controller	DIGBO9D	\$45.00
Bluetooth Garden hose Controller	DIGBOHE-BT	\$55.00

Pumps and Pump Accessories

Brookdale provides a variety of pumps, from combustion engines to electrical, or power take off driven pumps. These include low volume high pressure pumps to high-volume low-pressure pumps. Manufactures we distribute for are Rainbow Irrigation, Gould, Franklin Electric, Kifco, Pentair, Northstar, Monarch, Caprari, Ocmis, and Rovatti pumps. Please contact us to size the right pump for your application.

Rainbow Pumps the industry's best built engine pumps with John Deere or Isuzu diesel power units from 30 to 200 hp. Also available in electric VFD control. Engine pumps come with a murphy safety system monitor with auto shut down. Rainbow builds units with large fuel tanks and high-capacity radiators to prevent overheating. Quiet run type mufflers come standard, trailer or skid mount, and electric or protek primer. Please call for pricing and sizing per application.

Electric Pumps available from Gould, Franklin Electric, Pentair, StaRite. Single and 3 phase available in submersible or surface mount. Please call to size the right pump for your application

Monarch Electric pumps cast iron construction, with stainless steel motor shaft and a no maintenance mechanical seal. Motors are designed for trouble free continuous duty pumping. 230V. Includes camlock inlet, camlock 360-degree swivel outlet, 25-foot suction with foot valve. **Pump curves available**

Pump	GPM	Price
2" 3 HP Pump	77 at 40 psi	\$2,350.00
3" 5HP Pump	128 at 40 psi	\$2,650.00

Caprari PTO Pumps They come fully fitted with primer and isolation valve, pressure gauge and outlet pipe connection fitting of your choice. PTO pump cart frame is triangular to prevent vibration and rotation from PTO shaft. Pump curves available. Inlet, outlet fittings and suction hose are sold separately.

Pump	GPM	PSI	Suction	Discharge	Price
D2/40	50-150 GPM	45-145 PSI	3"	2"	\$5,635.00

AMT 23 HP Pump with Honda engine. A larger pump ideal for running overhead, kifco water reels and drip. Pump pricing below is an assembly including: 10 gallon stainless fuel tank, protek hand primer and 3" camlock inlet and outlet. \$6,975.00

Meganets Sprinklers

Frost Protection, Germination

Netafim Meganet Sprinklers output ranges from 0.88 gpm to 3.30 gpm. A balanced sprinkler design emitting water from two equal jets with no wobble. Excellent for frost protection, overhead watering, germinating root crops and hydro cooling. Can be installed with two different methods, Flexnet or Flat tube header pipe. The sprinklers are color coded by the flow rate for identification. UV treated and will last for years. Each sprinkler has a built-in filter to prevent the nozzles from getting clogged. Easy to set up and easy to move, the most versatile sprinkler on the market.

Ag-Rain Water Reels

Irrigate from 2.5 to 12 acres per run. Cover large acreage and curvy rows quickly and evenly. Available in Turbine drive or Engine drive models.

Brookdale Farm Supplies is the largest Kifco dealer in the Northeast Region. With units in stock and parts a phone call away, we have the water reel products to meet your needs. Considering a new reel and wondering what the coverage area would look like. Brookdale has exclusive reel design software (above image) that overlays coverage width and length on a satellite view. Very useful for reel model comparison and field layout. Contact us for a free simulation and quote at 603-465-2240 or email at tractortrv@aol.com

Electric drive available for low flow/well water applications. Solar Panel Kits and batteries have been designed for E110 and E140 models. Great for low pressure pumps.

Bauer Hose Reels

Rainstar A

Rainstar T

Rainstar E

Now offering Bauer hose reels. Bauer reels stand out in the industry for two major reasons. First, the TVR radial full flow turbine incorporates the turbine directly to the gear drive of the unit for less pressure loss and higher energy transfer with lower flow rates. Second is the Eco Star 6000 computer that is installed on each reel. This is a simple touch screen computer where the user programs the amount of water to apply. The Bauer SmartRain app allows the user to control the program remotely and receive real time SMS text updates. This includes automatic shut down and error notifications on the functionality of the reel. An integrated solar panel and battery allows for continuous operation. The computer functions facilitate a greater than 85% uniformity application to qualify for next level irrigation precision NRCS contracts. Contact us for a free simulation and quote at 603-465-2240 or email at tractortrv@aol.com

- Dual wheel gun cart
- Various supply hose connections

ProVeyor Trailers

- Speed up harvesting
- Gets the harvest crew to work at the same speed
- Saves harvest crews' back
- Harvest entire block at once
- Keeps produce covered once harvested
- Reduces damage to crops

Available in

- 18 ft wagon, with tandem 6-ton axels
- 24 ft wagon with tandem 8-ton axels

Both wagon sizes include

- 30-foot aluminum conveyer
 - adjustable in height
 - tilt conveyer angle
 - adjustable conveyer from 14"-40" from wagon bed
 - Powered by hydraulics
- Canvas Roof, Canvas roll up sides optional

RoHand II

- Adjustable platform can hold up to 300 lbs.
- Foot controls for speed and steering
- Adjustable width frame and height for better clearance
- Holds up to 7 Flats
- Solar panel charges lithium-ion battery
- Roof for sun and rain protection
- Roll down sides for rain and sun protection
- Speed up harvesting
- Saves pickers backs
- Keeps produce covered once harvested

Tailor-made soil preparation

Lots of custom options, call to discuss and quote.

Forigo is an Italian manufacturing company offering a wide variety of high-quality soil preparation equipment. The most common types that people are using in the northeast are power harrows, stone buriers, and bed formers. Each machine is customized specifically for your needs. This equipment is ideal for one pass tillage systems with high vegetative matter. Custom equipment requires lead time of 3 to 4 months for delivery. Orders are placed in January, and March. Call for quote.

Stone Burier

These machines process the soil and bury stones, cover crop residue, tree roots, and other debris with ease. The inverted rotation of the rotor combined with a selector rake and leveling bar cover the buried material with a fine and clean layer of soil. Stone buriers simplify the field prep for vegetable farms, creating well-formed stable and porous beds to either plant directly into or to lay plastic on.

Model	Working Width Inch	Overall Width Inch	Horse Power
G25-130	51	59	35-60
G25-150	59	67	35-60
G35-170	67	76	50-100
G35-185	73	81	50-100
G35-200	79	87	50-100
G35-230	91	99	75+
G35-250	98	107	100

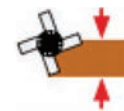

Rear Attachment Options

There are many rear attachments for the stone burier, depending on your end goals.

- Net roller, standard on all models. Ideal for direct seeding or raised bed making
- Smooth roller, better for small direct seeding
- Integrated bed former, for 4" + raised beds
- Hydraulic roller/former interchangeable cones for bed heights.

One Pass Tillage Combination Machine

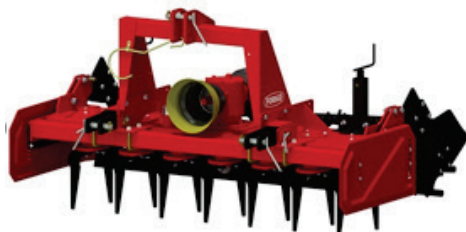

This stone burier multi machine incorporates all applications of laying plastic in one pass. This machine provides tillage, applies fertilizer and drip tape, forms a raised bed and can lay plastic all in one pass. The stone burier action can incorporate a living cover crop into the raised bed at a determined depth for later decomposed benefit for the cash crop. This machine requires high hydraulic flow capacity and heavy weight lifting capability due to its length. Cover crops taller than a foot should be flail mowed prior to incorporation. STF plastic layer can be removed with 2 pins allowing raised beds to be formed for direct seeding or transplanting. Also available in high clearance model. Call to design a multi machine for your application and review tractor requirements.

Stone Burier Model	Plastic Layer Model	Working Width	Plastic Width
G35-130	STF-110	51	4 foot
G35-150	STF-130	59	5 foot
G35-170	STF-130	67	5 foot

Power Harrow

These machines are based on the counter rotating vertical rotor with tines. This allows it to crumble large clumps of soil and leaves a level working surface behind. Also giving you excellent soil aeration while maintaining its natural composition.

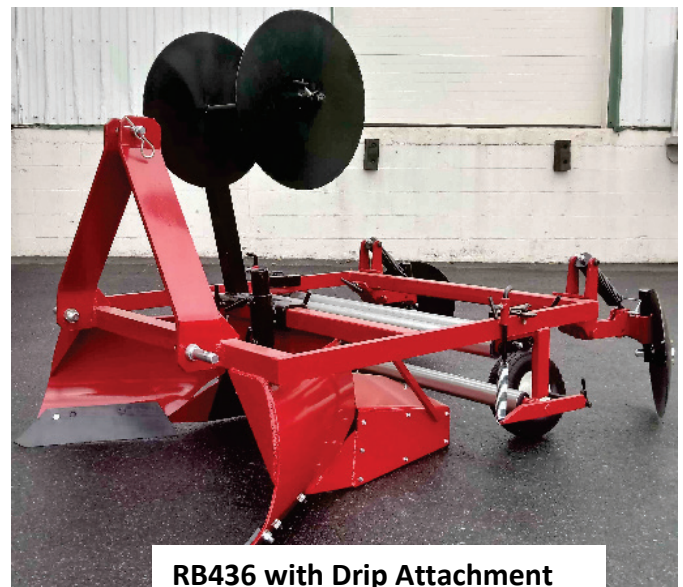

Model	Working Width Inch	Overall Width Inch	Horse Power

Raised Bed Plastic Mulch Layer

RB448 with Drip Attachment

RB436 with Drip Attachment

Features

- Compact machine, small tractors and high tunnel use
- Crowned bed is higher in the center
- Teflon lined bed press gives a smooth pressed seed bed and eliminates holes
- Adjustable tension on plastic roll prevents free spooling.
- Independently spring loaded press wheels ensure plastic is stretched tightly
- Large cover disks are independently spring loaded and are fully adjustable to insure the plastic is covered securely

Model RB448 Adjustable lays 3 or 4 ft. wide plastic, Forms 4" high and 20 or 30" wide bed, Hp. Req. 30-35.

Add \$125.00 for inbound freight **\$2,200.00**

RBA1 Drip Irrigation Attachment for RB448 **\$185.00**

RBA12 Double Drip Irrigation Attachment for RB448 **\$315.00**

RBA4 Adjustable Row Markers for RB448 or RB436 **\$160.00**

Model RB436 Lays 3 ft. wide plastic, Forms 4" high and 20" wide bed, Hp. Req. 25-30. Add \$100.00 for inbound freight **\$ 1,600.00**

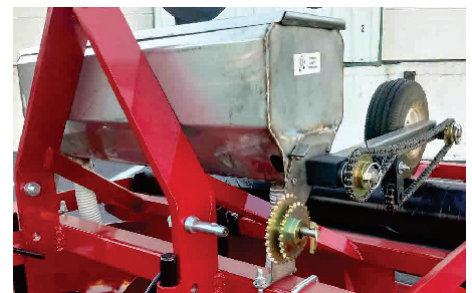

RBA11 Drip Irrigation Attachment for RB436 **\$185.00**

RBA121 Double Drip Irrigation Attachment for RB436 **\$315.00**

Dirt shields **standard on RB448**, Optional on RB436 **RBA2 \$88.00**

Stainless Steel Fertilizer Hopper

To incorporate granular fertilizers in the soil under the plastic mulch. Wheel drives off of plastic roll for consistent flow. **For granular fertilizer, will not work with powder.** Approx. 100-120 lbs. capacity. Adjustable flow, controls fertilizer rate. **RBA5 \$620.00**

Model 251^ Model 250>

Hydraulic Winder

The hyd control, controls reel speed & also has a relief valve for safety. 24" wide reel holds up to 1200 ft of plastic & drip tape. Model 250 has a removable end plate, simply flip two levers and pull off the end plate, The center is cone shaped making the plastic easy to remove. Model 251 is a collapsible reel with no end plate. Model 251 cannot use galv. spools. Cat. #1 - 3 Pt Hookup. Please add \$100.00 for inbound freight.

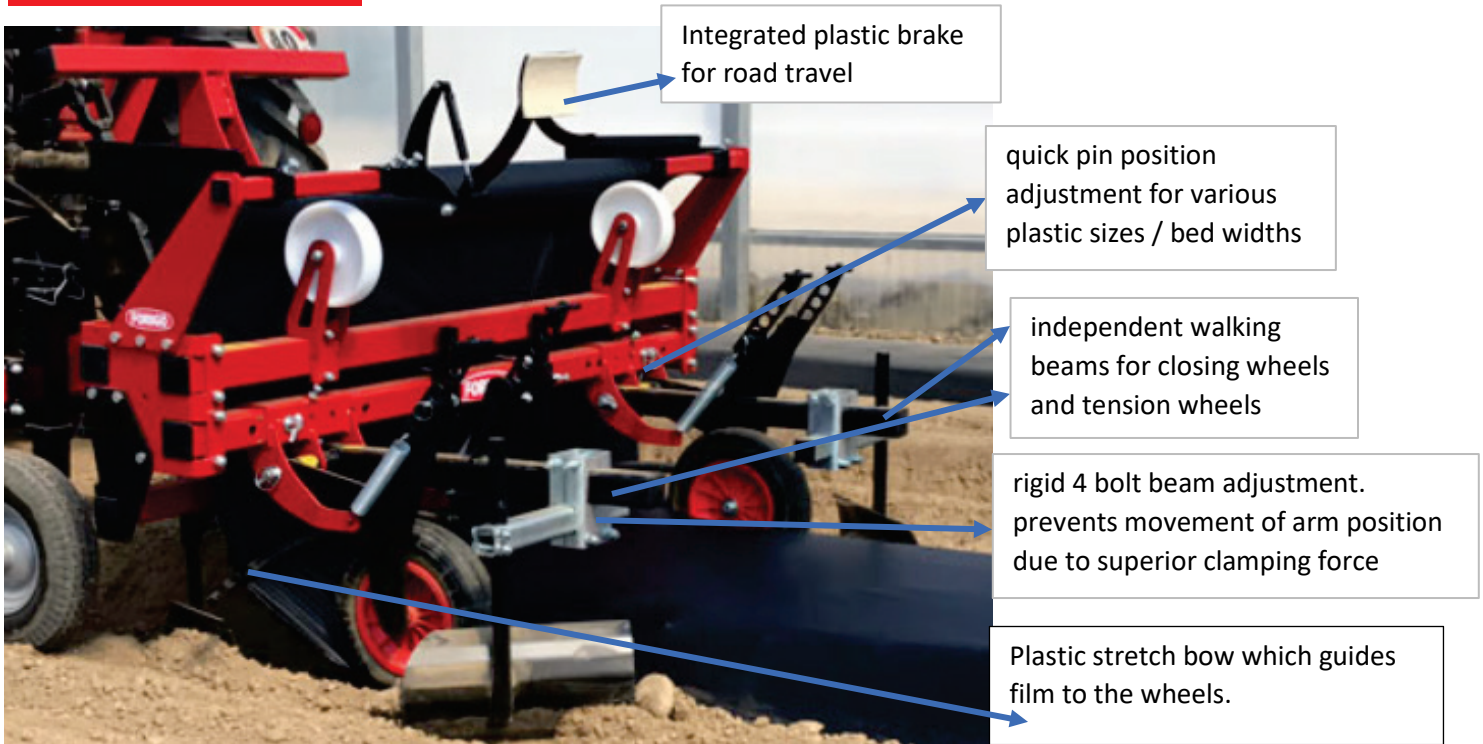

LIFSP Galvanized metal reusable spool for retrieval & storage of header lines, etc. Fits on 250 wrapper. **\$ 58.00**

Model250, stand on, removable cone and plate, good for galv. spools **\$1,485.00**

Model251, stand on, collapsible reel **\$1,485.00**

Bed Forming Machine with Plastic Mulch Layer Co.Modus

Co.Modus

Bed former and/or poly layer. The Co.Modus is a multifunctional bed forming machine that is different than what is currently offered in the market. A pair of front lateral discs direct soil into the bed forming hood that is finely adjustable for bed width, height, and side angle. All dimensions of the bed are adjustable in increments of 1.5 inches. Optional fertilizer hopper allows for precise placement of nutrients to feed the crop. The fertilizer hopper is electrically controlled with variable rate from the control box. Available with 1-3 rows of drip tape applicators per bed, drip tape travels through a square applicator tube preventing rotation of drip tape during application, keeping all stripes up. A removable poly layer attachment can also be added to this machine allowing you to lay plastic in one pass. The poly layer attaches to the bed former with 2 pins allowing it to float independently from the bed former. The tension wheels and closing discs are each on their own floating axel with independent spring tension for variable soil types. This is a unique feature not seen in the United States which allows this machine to work better with challenging terrain and topography. An optional hole dibbler can be added to the rear of the machine. Call to design plastic layer for your needs.

Water Wheel Transplanters

Model P150 3-point Hookup. Features 150 gal. tank, adjustable height on rear wheels and comb. cat. #1 & #2 lift pins. Top rack in back of tank is included, will carry up to 20 -#1020 flats. Add \$125.00 for inbound freight. **\$2,950.00**
Can special order the P150 combination model, ideal for using with horses. Call for a quote or more information.

Second Top Rack Bolts on in back on regular top rack, gives planter total carrying capacity of 26 trays **\$210.00**

Planting Wheels Standard spike has a 2 5/8" sq. base is 4.5" Long. Stock spacing: 12, 15, 18, 24, 30, 36, 42, 48" **\$155.00**

SUPER WHEEL for Snap-on Spikes (Order Spikes Separately) \$150.00
w/no. of spikes = spacing

Plastic Mulch Lifter

Designed to lift plastic prior to removal. The gauge wheels adjust the lifting depth, set depth to approximately 2 inches below the plastic. Machine can also be used to lift root vegetables for easy harvesting. Requires 50+ HP, able to lift 3-5 foot plastic. Hydraulic model is recommended for rocky soil. Add \$125 for inbound freight.

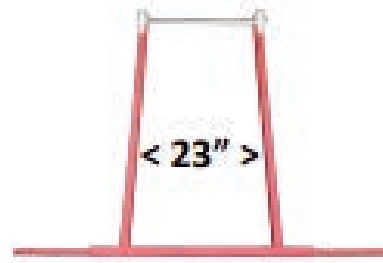

LIF550S Auto Hydraulic Reset: **\$3,280.00**
LIF500S Shear Bolt Protected: **\$2,290.00**
Optional Center Vine Cutting Disc: **\$215.00**

55

Water Wheel Transplanter passes over a completed bed, (performs equally well in raised or flatbed applications) planting wheel punches and waters the hole completely, and allows the operators, riding in a comfortable position, to place a plug, potted or bare root plant directly into the watered hole. Plant mortality is kept extremely minimal.

Check out these Key Features!

- Open Back of the machine makes planting wheel changes easy.
- Stainless steel planting wheel axle for easy planting wheel change.
- Compact design allows closer row centers, short turns at ends of rows
- Increased water and tray carrying capacity, up to 20 trays
- Twin Parking Stands
- Fully adjustable comfortable high back cushioned seats with foot rests
- Tank shut-off valve can be reached from the seats, independent flow on each side.
- Plant up to 3 rows per bed

Hand Drawn Planter Wheel Bracket Use with any planting wheels. For row marking or when it is too wet to go in to the fields with a tractor. 1-4 rows per bed, space and stagger wheels as needed. Ideal for onion planting, seeding summer squash into black plastic, flowers and many other crops **\$175.00**

Rubber Stoppers for unused slots in Super Wheel RSS \$0.75 each

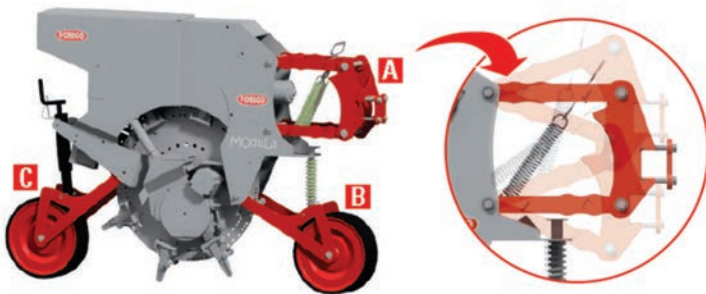

Modula

Seed directly into plastic

Modula

Modula is a precision vacuum seed drill that seeds directly through plastic. Its variable wheelbase allows the Modula to seed straight through plastic or biodegradable mulch, with the same flexibility of other seed drills in bare soil. The perforating cones receive the seed from the distributor and place them in the ground. The machine's movements are electronically driven, so they are free from any mechanical transmission. The seeding units are easily added or removed from the tool bar which allows you to plant multiple rows on plastic. Multiple seed distributors can be purchased for a wide variety of crops and spacing. Different vacuum plates are required for different sized seeds. The display of the Modula allows you to control and set up the system from the tractor cab. Call to build your custom machine.

- A:** The front amortized parallelogram allows the machine to adapt to the irregularity of the soil
- B:** the front wheel prepares the land, preserving the compaction of the soil
- C:** the rear adjustable wheel defines the depth of the seed and closes the hole after planting.

Number of cones	2	3	4	5	6	7	8	9	10	11	12	13	14	15
seed spacing inches	46	31	23	18.5	15	13	11.5	10	9	8	7.5	7	6.5	6

The display allows you to control and set up the system from the tractor.

s

THE METERING UNIT

The metering unit accurately places seed in the ground with the minimum of damage as every moving part is rubber covered. Seeds in the hopper fall past the choke (A) which regulates the quantity of seed in the chamber. The seed belt (B) is rotated clockwise by the drive wheel (C) while the repeller wheel (D) rotates anticlockwise to remove excess seed away from the holes in the belt only allowing the required amount to drop through at the end of the spring base (E). The seed drop into the bottom of the furrow is only 25mm minimising bounce or roll of the seeds.

The metering unit can be fitted into three different chassis types to suit a range of grower requirements:

820 Handpush Belt Drill designed for planting small areas and small quantities of seed at a time. The large diameter rear cage wheel and ergonomic handles makes it easy to push. The four speed pulley drive gives four seed spacings per seed belt.

- Aluminum Design only 26kg total weight
- 5mm depth adjustment increments via coulter stem, between 0-50 mm
- adjustable height handlebars
- 4 liter seed hopper

840 Belt Drill designed to fit behind compact and small tractors or ATVs. An ideal machine for the smaller grower or market gardener. Drive comes from the large diameter rear cage wheel. The four speed pulley drive gives four seed spacings per seed belt.

- 5mm depth adjustment increments via coulter stem, between 0-50 mm
- 4 liter seed hopper per row unit
- Floating linkage
- Adjustable rear wheel pressure via spring
- Wheel Scrapers

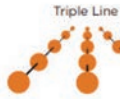

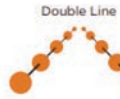

870 Belt Drill is the market leading belt planter. With a 7-speed pulley drive courtesy of adjustable height land wheels, the 870 can work on the flat or bed setups. Available from 2 rows up to 18 rows and capable of multiline planting, the 870 is robust, scalable, and adaptable for every seed type.

- Floating linkage
- Adjustable rear wheel pressure via spring
- 4 liter seed hopper
- wheel scrapers
- adjustable height land wheels
- 5mm depth adjustment increments via coulter stem, between 0-50 mm

Small Seed precision air drills, the ideal choice for carrots and onions. These seeders allow for easy and precise adjustments which gives uniformity of seed depth and seed soil contact which ensures regular and even germination.

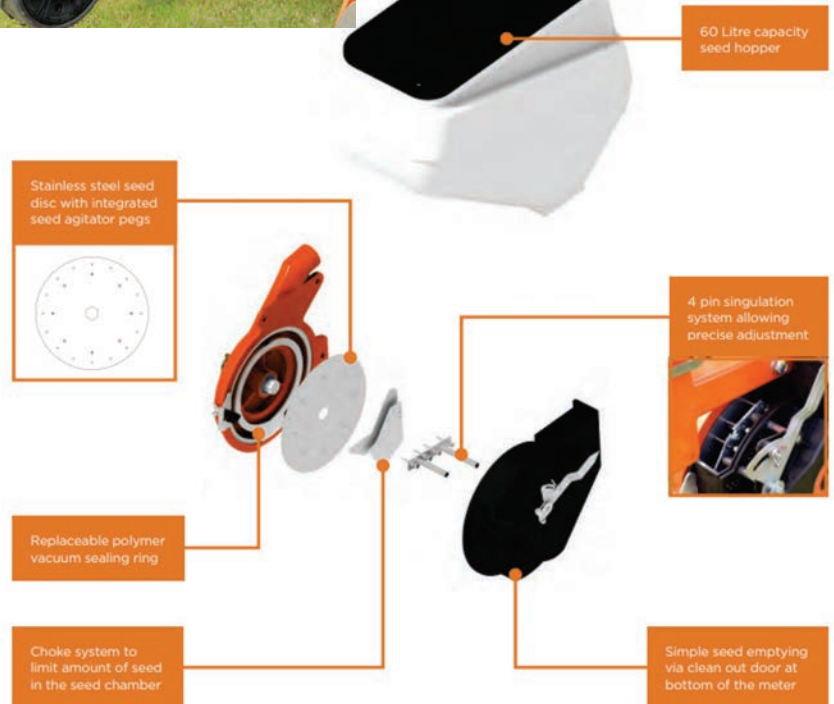

- Optional rear wheel rake to prevent a smooth surface from being left behind to reduce chances of capping. Tines can be adjusted in height and angle to suit conditions.
- Choice of drag, single or double arm coverers with adjustable lower half to set distance between the arm and line of seeds.
- Working depth of arm & the downforce can be adjusted
- The metering unit is optimized for multi-line work featuring a 'knife edge' seed ejection system
- Metering unit is easily opened without the need for tools
- Choice of hoppers capacities, 1, 2, 6, or 8 liter

X10 Air Drill a dedicated single line row unit for those growers who do not require multi-line performance.

X30 Air Drill a multiline row unit capable of seeding 1-4 lines of seed per row unit.

XL: Precision Large Seed Drill is a robust pneumatic precision seed drill for a range of large seeds- pumpkins, corn, beans, peas. PTO or hydraulic drive vacuum fans coupled with mechanical or hydraulic drive systems are available in a variety of rigid or folding frames can be suited to any machine layout from 6.5- 30 plus feet. Most aftermarket gravity fertilizer applicators can be fitted onto the universal mounting brackets.

Checchi & Magli Transplanters

High quality Italian made transplanters for both bare ground and plastic. Transplant water and extra tray storage available. Contact for transplanter design questionnaire and pricing.

The Uni-Trium and the Uni-Fox have an independent drive, meaning each row unit moves independently from the others. This feature is ideal if you have a lot of hills, rocks or are planning on using the planter for no-till. If one row unit gets caught on a rock only that row will be affected. With a dependent drive found on a trium or fox transplanter all row units are tied together from one universal gear drive axle.

Cover Crop

Can also order King's AgriSeeds forage mixes.

Cover Crop Mixes and Individual Species

Available in 55-pound bags or 2000-pound bulk bags

- ❖ Rye, Crimson Clover and Daikon Radish Mix
- ❖ Rye, Crimson Clover and Wheat Mix
- ❖ Rye
- ❖ Oats and Peas Mix
- ❖ Field Peas
- ❖ Create your own mix, or select one of King's AgriSeeds mixes

No-Till Transplanters

The ideal plug size for a no-till transplant is a 72-128 count tray size. The smaller plug is needed to increase native soil contact and improve transplant survival. With the smaller transplant size planting schedules may need to be pulled ahead a week or two depending on timing or if row cover is being used.

P1500 Combination Pull-type with large transport wheels, it converts easily to 3-point hook up by pulling 3 pins and dropping the hitch. Has adjustable turnbuckle on hitch for easy leveling. Same features as the P150, found on page 53. Ideal for those who want to use the no-till attachment in addition to their regular planting. Add \$125 inbound freight, **\$3,390.00**

Hydraulic lift No-till unit for P1500, attaches on the P1500 3-point hook up instead of the hitch. Extremely easy to hook up and unhook to easily switch between no-till and conventional. Twin waved, spring loaded coulters and drip attachment. Call for pricing.

JM Shirk Manufacturing

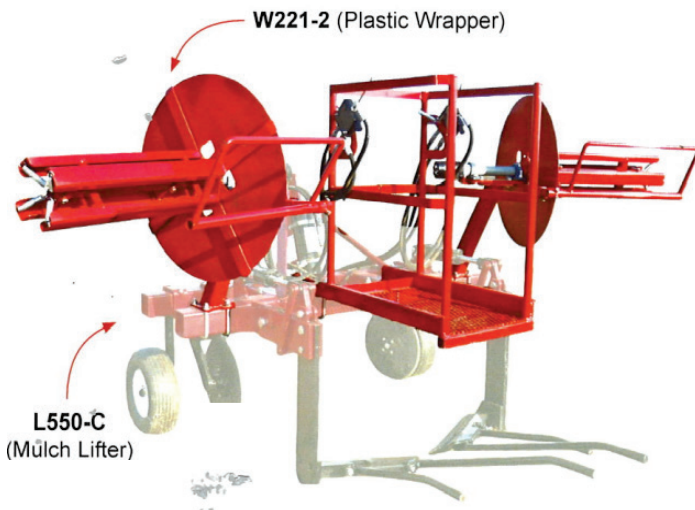

Swivel Shanks ii

- Available in 1-6 shank
- Quick-hitch compatible, Cat #2 & Cat #3
- Standard tooth is Yeoman no-till point (other options are available)
- Heavy-duty 20" trash coulters feature swivel and spring cushion
- Great soil penetration due to the machine weight. 3 shank unit weighs 2,000 lbs
- Hydraulic reset provides reliable and smooth trip action
- Standard Shank Spacing is 30". Use next sized frame for wider spacing
- 25-50 HP per shank, depending on soil type and working depth
- **Regular Frame:** 4" x 4" x 1/4" tubing, 8.5 x 18 wheels, 1 parking stand
- **Heavy Frame:** Made from 4" x 6" x 3/8" tubing, 6 lug- 8.5 x 29 wheels, 2 parking stands

Call to design your custom machine. 6-8-week lead time.
Order early to have in time for spring!

Combination Lifter and Winder

Plastic lifter and winder in one machine, lift and remove 1 row of plastic and drip tape in one pass. Needs two sets of hydraulic remotes, one for the lifter reset and one set of remotes for the winders. Winders have collapsible core for easy removal of tape and plastic.

3 in 1 Sweet Corn Planter

Plants 2 rows of sweet corn in furrows. 22" between rows. Between plant spacing 16"-30" and is easily adjustable. Uses John Deere 7000 series row units with precision planting finger meters, seed firmer and rubber closing wheels. The 2 furrow openers are 12" double discs that are adjustable in height with pin.

Sprays pre-emerge herbicide on top of the seed bed as well as between the rows for weed control. 25 gallon tank covers 1 to 1 1/2 acres, pto driven roller pump, regulator, valve and gauge, 3 fan nozzles under plastic, 2 rear nozzles for coverage between rows. (Can get a 55-gallon tank)

Lays 4'-5' plastic firmly over the top of bed ridges and buries both edges in the soil. The layer is fully floating and is easily removed for plantings later in the season. The ventilation holes get punched as the plastic is laid.

520 Cultivation Tractor

The tilmor 520 tractor can be adapted to a multitude of crops and cultural practices. The 520-cultivation tractor allows repeatable, predictable, profitable, and scale-able practices to reduce manual labor and costly downtime.

- 22HP Kubota liquid cooled diesel
- 18 inch ground clearance
- 50-78 inches (center- center) wheel adjustments

240 Power Ox

The Tilmor 240 power ox has a balanced and light weight design for optimal maneuverability and control. The 240 power ox’s high clearance and precise tool tracking make it the ideal two wheel tractor for cultivation.

- Honda GX120 engine
- 13.5 inch ground clearance
- 16-24 inches (center-center) wheel adjustments

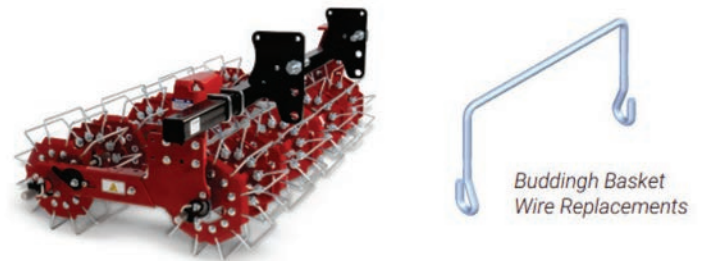

Basket Weeder & Wires

Used for between row weeding and ideal for early season cultivation

Put the baskets together to prepare a stale seedbed
 Tractor baskets can be mounted on Tilmor 520, Farmall Cubs, Kubota L245s, Allis Gs, and other tractors
 Walk-behind basket weeders can be mounted on Tilmor Power Ox, BCS tractors and more.

Spyders can replace front baskets for harder, rockier soil

Finger Weeders

Used for in row cultivation; the finger weeder uproots small and just emerging weeds. The ground engaging steel drive plate turns the flexible polyurethane fingers at a faster speed to “flick” out emerging weeds at the hair stage.

9, 13, and 15 inch available.

Select from medium and hard fingers depending on growing conditions. Customize mounting options to fit your system.

Edge of Plastic Maintenance

Forigo Shredder/ Mowers

FT8 Shredder is ideal for the 30-50 horse power tractors. This shredder is great for mowing cover crop, managing field edge, and mowing between rows.

- Universal 3 point linkage Cat 2
- Double fixing position for front and rear mounting
- Gearbox with overrun clutch 540 rpm PTO
- Belt driven transmission
- Rotor with hammers
- Adjustable reinforced roller with scraper
- Reinforced front protection flaps

Model	Working Width Inch	# Hammers	HP Required	Weight lbs
FT8-110	43	10	30-40	660
FT8-130	51	12	30-40	730
FT8-150	59	14	35-40	795
FT8-180	70	16	40-50	905
FT8-200	81	18	40-50	995

T18S Shredder/Flail Mower is ideal for mowing cover crop, chopping brush, managing field edges and over grown brook banks.

- Special semi forestry rotor with hardox hammers, durable and long lasting
- Spherical roller bearings
- Belt driven transmission
- Strong side panels
- Adjustable reinforced roller with scraper
- Reinforced front protection flaps
- 540 rpm with overrun clutch
- Side shift

Model	Working Width Inch	# Hammers	HP Required	Weight lbs
T18S-160	61	14	60-100	1390
T18S-180	69	18	60-100	1545

T18S-250	96	22	70-100	1965
T18S-280	108	24	70-100	2095
T18S-300	116	26	80-120	2250

TL16 Shredder/Flail Mower is an offset mower. It is ideal for managing brook banks, stonewalls, and field edges.

- Swinging and self-leveling 3-point linkage Cat. 2
- External gearbox 540 rpm with overrun clutch, gearbox protection bracket
- Hydraulic cylinder for machine side shift
- Hydraulic cylinder for machine inclination
- Dual safety breakaway system (antishock) by springs and security hydraulic valve
- Adjustable rear roller reinforced with scraper
- Reinforced front protection flaps
- Pair of lateral adjustable skids
- Spherical roller bearings on rotor
- Belt driven transmission

Orchard Pruner CRF

- Hydraulic lift of 34.4 inches
- Hydraulic tilting column, 15%
- Hydraulic side shift 19.7 inches
- Vertical bar with SCH tooth
- 3 point hitch
- Cuts branches up to 1.6 inches in diameter
- Can customize each machine adding a top bar and or a bottom bar.

SLR-Sucker Remover on Bio-Dynamic Frame

- 3 point hitch cat. 1-2
 - Hydraulic side shift
 - Manual tilting
 - Adjustable gauge wheels
 - Manual head tilting
- Great for sucker control and weed control

RSI 65- In and Out Mowing Wheel on Bio-Dynamic Frame

- 3 point hitch cat. 1-2
- Hydraulic side shift
- Manual tilting
- Spring load support for in and out
- Adjustable gauge wheels

Valente Trellis Systems

Brookdale Farm Supplies has partnered with Valente for distribution in the United States. Valente's concrete posts are prestressed, reinforced posts that are trapezoidal shaped, with four smooth sides and no edges. This design prevents wear on hail netting and coverings. Valente trellis can be used in apple orchards, cherry orchards, vineyards and more. The system can be designed three different ways; standard trellis support, tall trellis support for future netting, or tall trellis with hail or over coverings included. Contact us for a design and quote at 603-465-2250 or tractortrv@aol.com

Trellis at Brookdale Fruit Farm, Hollis NH

Valente offers a complete trellis system that is engineered to support the crop and plants for years to come. By taking a systems approach to trellising every component is engineered to work within the system, including hail net, anti-rain coverings, shadow system, insect netting and more.

UNA PASSIONE TUTTA ITALIANA

- Approximately 2.5 acres per 20-foot container
- Container is shipped directly to your location
- 2-3-month lead time, from order to delivery
- A special tool is required for unloading
- Install either with a vibrator or post pounder with a dampening rubber cushion
- 1-8 wire systems available
- Line post spacing 25-30 feet depending on design

The posts are trapezoidal (bread-loaf) shaped which prevents wear on the coverings.

Lagasse Orchard Equipment

Hedgers

Lagasse Orchard Hedger is designed to mount on an orchard tractor's front three-point hitch, rear hitch- bobcat frame or bucket mount. Either Cat 1 or Cat 2 mounting. The hedger has a single, vertical cutter bar mounted 3' 8" to the right of the tractor centerline. The cutter bar is 11' long and approximately 12" above the ground. The cutter bar is a sickle bar type with bolt on replaceable knives. Three hydraulic remotes required to operate. Single or double available. Call for options and quote.

Bin Trailers

Lagasse Orchard Bin Trailers are ideal for easily transporting 1-5 bins or nests of bins to and from the orchard or field. Universal design for wooden or plastic bins. The bin trailer is chain driven requiring three hydraulic remotes to operate. The trailer deck tilts so the forks at the end of the trailer slide under the bin, allowing the chain to grab the bin and move onto the trailer body. When off-loading the trailer tilts and the chain runs in the opposite direction to off load the bins. Easy to use and makes moving bins a breeze. Call for options and a quote.

Tow Behind Work Platform

This 2 level work platform gets towed through the orchard from the drawbar on the tractor. Built for trellis installation, tree training and pruning. Adjustable width platforms to fit row spacing from 10-15 feet. Automation can be added to operate the tractor from the platform. Call for options and a quote.

Tree Planters

Lagasse Orchard tree planters are available in 1 row or 2 row. Call for details and pricing.

Straw Mulcher

Lagasse Orchard straw mulcher is designed for small square bales. Conveyor chain feeds in the straw bales to a group of knives that cut the straw and drops it over the row. Machine is designed to mount on a trailer for easy straw loading. Placement can be on top of a crop like strawberries or between rows of plastic for weed control. Call for details and pricing.

Orchard Supplies

Trellex Steel Trellis systems

Steel posts system for high density plantings on 25 foot post spacing. Octagonal design for strength and coated to prevent corrosion. Call for system quote

Coated Steel Posts			
Item	diameter	length	Price
Titan 95 post	3.75 inch	14 feet	\$43.75
Titan 65 post	2.6 inch	14 feet	\$32.50
Parts			
Cap 95 post	\$9.00	Wire clamp	\$0.35
Cap 65 post	\$8.00	Anchor tensioner	\$11.00
Crop tensioner	\$12.50	Sink Plate	\$5.00

Universal Trellis Clips

The clip attaches to the trellis wire keeping the tree standing firm, even when windy. It is easy to install and only requires one hand allowing the other hand to hold the tree straight. Can also be used for berry canes. Call for multiple case pricing.

Item	Item Number	# in Case	Price
2" Small Hook	ETC-2	3000	\$275.00
3" Large Hook	ETC-3	2500	\$275.00

SUNUP Reflective Films

One-sided metalized, multi-layer films for orchard use. Designed for maximum reflectivity and puncture resistance. Helps color hard to color apple varieties.

Item	Item Number	Price
80" x 5000'	SUN805	Call
100" x 5000'	SUN105	Call

Transpira powered by treetoscope directly measures a plant's water consumption, providing simple, specific, and actionable information to support irrigation decisions. Transpira is easily installed in minutes using basic tools. The transpira sensor is installed directly into the trunk of the tree. This sensor is then able to measure the sap flow in that tree, which provides critical insight into water use dynamics and is used to determine the crop water stress. This then allows you to make informed decisions on your irrigation schedule and needs based on what is happening in your trees. Call for more information.

Alpen
By Felco

ALPEN, born in Switzerland from Felco, to meet demanding professional requirements. Robust, durable, ergonomic, they have been designed for professional use.

Holster Tambo 990

Leather holster fits Alpen hand tools
\$19.00

Wildhorn 32 electric pruning shears

Swiss-made electric pruning shears. Wildhorn 32 delivers a full day of work and includes every accessory you need stored easily in a heavy-duty carrying case. Includes 3 batteries and a 3-way charger, up to 12 hours run time.

- Half and full opening modes
- Toolkit included for maintenance
- LCD screen to easily read tool & battery statistics

\$499.00

Wildhorn 40/100

Telescoping pole designed to help you reach and prune the entire orchard with ease. Lightweight and durable the pole extends up to 2.1m, (6.89 feet). Made with aluminum. It comes with a comfortable harness to make the extension pole easy to use and manipulate.

\$125.00

Beverin 10 electric chain saw

Lightweight build and ergonomic design provides superior comfort and control while the powerful electric motor ensures quite operation. Automatic chain lubrication ensuring smooth and efficient performance. Can cut up to 10 cm (3.97 inches)

- 1 spare chain included in kit
- Toolkit included for maintenance
- 2 batteries and charger

\$399.00

Wildhorn 40 electric pruning shears

Swiss-made electric pruning shears. Wildhorn 40 delivers a full day of work and includes every accessory you need stored easily in a heavy-duty carrying case. Can cut up to 40 mm (1.575 inches), has a gold plated, antimicrobial blade- ideal for cutting out fire blight. Includes 2 batteries and a 3-way charger. Includes extension cable

- Half and full opening modes
- Toolkit included for maintenance
- LCD screen to easily read statistics

\$640.00

Harvest Containers

Easy to clean and sanitize—they can also fit easily on a pallet to keep them off the ground. All bottoms are vented and are large enough to allow dirt and plant debris to escape when power washing. They work well in the field, are easy to store and clean. Call for pallet quantity pricing.

Red and Yellow Totes

Capacity: 44 lb.

Drainage: Vented bottom and sides

Storage: (half turn) stack to nest

Price: Red: \$19.25

Yellow: \$16.00

Dimension: 23.6" x 15.7" x 7.8"

Green Harvest Tote

Capacity: 1.75 Bu. 80 lb

Dimension: 23" x 18" x 12"

Drainage: Vented bottom and sides

Storage: (half turn) stack to nest

Price: \$21.75

Utility Totes

Capacity: 1.22 Bu. 45 lb.

Dimension: 19" x 19" x 10"

Drainage: Bottom drain holes

Storage: (Quarter turn) stack to nest

Price: \$18.00

1.25 Bushel Basket

Capacity: 1.25 bushel

Dimension: 19.2" diameter, 17" height

Drainage: Vented bottom and sides

Storage: Nests

Price: \$16.75

Gray Harvest Tote

Capacity: 60 lb.

Dimension: 24" x 16.13" x 7.25"

Drainage: Vented bottom and sides

Storage: (half turn) stack to nest

Price: \$14.50

Green Picking Basket

Capacity: 35-40 lbs, 5/8 bushel

Dimension: 15" diameter, 13" height

Drainage: Vented bottom and sides

Storage: nesting

Price: \$10.00

1 Bushel Basket

Storage: Nests

Price: \$12.00

Berry Tray

Capacity: 20 lbs, 12 pints

Dimension: 18.75" x 13.64" x 4.56"

Drainage: Vented sides and solid bottom

Storage: half turn stack to nest

Price: \$11.75

Red Picking Basket

Capacity: 25-35 lbs, 1/2 bushel

Dimension: 12" diameter, 13" height

Drainage: Vented sides and solid bottom

Storage: nesting

Price: \$8.50

Cut Flower Bucket

Solid base allowing for top-heavy blooms. 30 per case. Sold by the case. Call for skid pricing 40 cases.

Price: \$43.00/case

Decade Harvest Bins

Decade Bins are constructed of high-density polyethylene (HDPE) that stands the test of time. These containers are durable yet lightweight. These bins meet USDA/HACCP standards for direct food contact and can be easily sanitized. The MAC X harvest bins are the most versatile for agriculture as they share the same footprint as a standard pallet. Call for current availability. Bins are stocked in small quantities at Brookdale for pick up. 150 MacX bins in a trailer load. Order in advance of harvest season. Custom plate lead time 4-6 weeks. Second quality bins available

MacX ACE 20 Bushel Bin

Dimensions : 48" x 40" x 31"

A one piece injected molded bin with integrated runners. Bin runners are available in short side (40") or long side (48") construction. Information card slots are molded on all four sides. Nesting and stacking latches are built into the design of bin to interlock bins when stacked or nested for storage.

MacX 20 Bushel Bin

Dimensions : 48" x 40" x 31"

A one piece injected molded bin with clipped in replaceable bin runners. They are available in **solid** or **vented** construction. Bin runners are available in short side (40") or long side (48") construction. Information card slots are molded on all four sides. Nesting and stacking latches are built into the design to interlock bins and prevent movement.

Alto 1400 Bin

Dimensions : 45" x 51" x 49"

A one piece injected molded bin with clipped in replaceable bin runners. They are available in **solid** construction. Information card slots are molded on all four sides. Nesting and stacking latches are built into the design to interlock bins and prevent movement. Ideal for vineyards.

Customize your bins with your name or company logo molded right into the bin. A onetime plate charge for logo construction. No charge for repeat orders.

MacX Solid Bin

Lids are available for all bins. Lids include locking stacking features. Seals for liquid processing/fermentation and keeps stored product dust free.

MacX Half Height Bin

Dimensions: 48" x 40" x 18"

MacX48 22 Bushel Bin

Dimensions : 48" x 48" x 24"

A one piece injected molded bin with clipped in replaceable bin runners. They are available in **solid** or **vented** construction. Information card slots are molded on all four sides. Nesting and stacking latches are built into the design to interlock bins and prevent movement.

Shrink Wrap for Pallet Wrapping

Great Stretch and Super Strength the 16" x 1500' wrap is ideal for produce pallets. Comes in cases of 4 rolls per box \$65.00 per case

Cardboard pricing changes throughout the season. Other types of packaging can be ordered with a weeks' notice. For Pallet quantities and volume discounts please call for pricing. Special order cardboard is not returnable nor refundable.

Pest Control

ProtekNet Insect netting, is the ultimate in exclusion netting. ProtekNet is highly effective, and has no thermal effect on crop its protecting. Summer heat and coverings are not an issue with this product. It is possible to sew the nets together to make larger sheets. ProtekNet is best used with a support structure such as wire hoops over the crop. Best to hold down with sand bags. Call for more information.

Brookdale Fruit Farm - Irrigation System Questionnaire

Need Help Designing an Irrigation System...We Can Help!

To get things started please complete the information below:

1. What is your water source (pond, well, municipal river): _____
2. How far is the water source from the field: _____
3. How much water is available in gallons: _____
4. What crops are you growing: _____
5. What are the field dimensions: _____
6. How many rows do you have: _____
7. What is the row spacing: _____
8. How long are the rows: _____
9. What is the plant spacing: _____
10. How many zones would you like to have on your system (more zones = more flexibility): _____
11. Would you like a fertilizer injector in the system: _____

Map Area – Please complete a drawing with rough distances of your field layout:

Please complete contact information below and Fax or Email this page to:
